● PROFESSIONAL SUMMARY

Full-stack software developer with over 1 year of professional experience at Freight In Time, one of East Africa's leading logistics companies. Delivers production systems across the full stack — from React/FastAPI customer-facing websites and Laravel ERP portals to Azure AD identity platforms integrating D365, OPS, and BIZ PRO. Strong focus on clean, maintainable code and real business impact, with active growth in cloud infrastructure and DevOps.

● EXPERIENCE

Software Developer (Intern → Full-time)

June 2024 – Present

Freight In Time Group — Nairobi, Kenya

- Built and deployed a React/Vite + FastAPI public logistics website (freightintime.net) with quote system, interactive 3D Africa globe, and AI chatbot.
- Developed a revenue integration and quotation portal using PHP, Laravel, SQL Server, and stored procedures — used daily by operations staff.
- Designed and built an Azure AD identity management platform to provision users across D365, OPS, BIZ PRO, and FIT Express, with role, function, and multi-office assignments.
- Implemented an automated customer email notification system reducing manual follow-up effort.
- Built a login activity tracker giving management visibility of user sessions across all integrated enterprise systems.
- Delivered additional internal tooling to streamline operations, monitoring, and workflow automation.

● KEY PROJECTS

Freight In Time Website

freightintime.net

React · Vite · FastAPI · Python · MySQL

Production logistics website featuring customs brokerage pages, interactive 3D Africa globe with office markers, quote request system, and an AI-powered chatbot.

Azure Identity Management Platform

bizuat.freightintime.com

Laravel · PHP · Azure AD · SQL Server · Microsoft Graph API

Enterprise user lifecycle system — provisioning, role/function assignment, and access control across 5 integrated applications with full transaction rollback safety.

FIT Logistics ERP Portal

bizuat.freightintime.com

Laravel · PHP · MySQL · SQL Server · REST API

Internal ERP/CRM portal with quotation management, CRM sync, web-sourced quote ingestion, and multi-office scoping across East Africa.

Login Activity Tracker

bizuat.freightintime.com

Laravel · PHP · SQL Server · Azure AD

Analytics dashboard tracking sign-ins across Odoo, D365, OPS, BIZ PRO, and FIT Express — with monthly summaries and inactive user detection.

Dynamic Parcel EA

dynamicparcelea.com

TypeScript · React · Tailwind CSS

Live parcel and courier services website for the East African market with service listings and a clean modern UI.

Mazingira

React · Flask · PostgreSQL

Community-driven environmental preservation platform with real-time monitoring and data visualisation.

react-mazingira.vercel.app

E-Commerce 2.0

Next.js · Stripe · Prisma · PostgreSQL

Modern e-commerce platform with Stripe payments, inventory management, and real-time order tracking.

e-commerce-2-0-coral.vercel.app

● STRENGTHS & GROWTH AREAS

STRENGTHS	GROWTH AREAS
Ships to production Builds real systems used by real users — not just demos or prototypes. Cross-stack ownership Comfortable from React UI through to SQL Server stored procedures and Azure AD APIs. Fast self-starter Picked up Laravel, Azure Graph API, and SQL Server independently on the job. Problem-first thinking Investigates root cause before writing code — avoids speculative fixes. Business context Works inside a logistics company; understands domain requirements, not just syntax.	Cloud & DevOps depth Actively building skills in Docker, CI/CD pipelines, and cloud infrastructure. Automated testing Prioritises delivery; expanding practice of unit and integration test coverage. System design at scale Growing experience designing for high-traffic and distributed systems. Formal documentation Strong inline clarity; developing habit of structured API and system docs. Agile workflows Primarily solo/small-team experience; expanding familiarity with full Agile process.

● EDUCATION

Software Engineering

Moringa School — Nairobi, Kenya

Full-stack software engineering: React, Python, databases, REST APIs, and project-based development.

2025

● TECHNICAL SKILLS

Frontend	React, TypeScript, JavaScript, Tailwind CSS, HTML/CSS, Vite, Next.js
Backend	FastAPI, Python, PHP, Laravel, Flask, Node.js, REST APIs
Databases	MySQL, PostgreSQL, SQL Server, Prisma, Stored Procedures
Cloud & DevOps	Azure AD, Microsoft Graph API, Git, GitHub Actions, CI/CD, Vercel, Render
Tools	VS Code, Postman, Figma, Jest, FTP Deploy
Languages	English (professional) · Swahili (native)
